## Subria Virtual Announces Inaugural Network Launch During VATSIM's "24 Hours of VATSIM" on October 3–4, 2026

*Europe's New All-Airbus Virtual Airline Unveils 44,779 Routes, 3,920 Aircraft, and a 44-Week European Focus Airport Calendar Powered by vAMSYS Phoenix*

**LONDON / PARIS / ROME / WARSAW — SEPTEMBER 2026** — Subria Virtual, an ambitious new European virtual airline network dedicated exclusively to modern Airbus flight operations, has officially announced its inaugural public network launch during VATSIM's flagship global event, **24 Hours of VATSIM (8th Edition)**, taking place on **Saturday, October 3 through Sunday, October 4, 2026**.

Engineered from the ground up for authenticity, expansive pilot choice, and high-fidelity flight simulation, Subria Virtual introduces one of the most comprehensive network infrastructures in virtual aviation history: **44,779 active routes** connecting **627 global destinations** across **44 strategic European hub airports**.

### 100% MODERN AIRBUS FLEET ACROSS 112 SUBFLEETS

Subria Virtual operates an exclusively Airbus fleet of **3,920 aircraft** structured across **112 tailored subfleet configurations**, accommodating every flight simulation passion and platform:

- **Short-Haul & Regional Workhorses:** The agile Airbus A318 "Baby Bus" (certified for steep approaches into London City EGLC), alongside the trusted A319 and A320ceo/neo twin-jets.
- **Transcontinental & Trunk Express:** The high-efficiency A321ceo/neo, A321LR/XLR, and the widebody A330-200, A330-300, A330-800neo, and A330-900neo twins.
- **Long-Haul & Flagship Heavies:** The iconic quad-engine A340 series (-200 through -600), the ultra-modern composite A350-900 and A350-1000 flagships, and the double-deck A380-800 for worldwide mega-hub sectors.
- **Freighter & Industrial Logistics:** Dedicated air cargo operations flown with the A300-600F, A330-200F, A330-300 P2F, and the specialized Airbus Beluga A300-600ST and A330-700L BelugaXL factory circuit under the AIRBUS INDUSTRIES banner.

### 4 DISTINCT REGIONAL DIVISIONS

To preserve regional identity while offering boundless connectivity, operations are partitioned into four divisions:

- **Subria Northern (SZN) — London Heathrow (EGLL):** 10,878 routes connecting the UK, Ireland, Scandinavia, Iceland, and Greenland.
- **Subria Southern (SZS) — Rome Fiumicino (LIRF):** 24,679 routes serving the Mediterranean, Italy, Spain, Portugal, Greece, Cyprus, and Turkey.
- **Subria Western (SZW) — Paris Charles de Gaulle (LFPG):** 15,160 routes across France, Germany, Benelux, Switzerland, and Austria.
- **Subria Eastern (SZE) — Warsaw Chopin (EPWA):** 4,097 routes spanning Central/Eastern Europe, Poland, the Baltics, and the Caucasus.

### 44-WEEK EUROPEAN FOCUS AIRPORT ROTATION CALENDAR

Following the 24 Hours of VATSIM launch weekend, Subria Virtual kicks off its signature **44-Week Focus Airport Calendar** on **Monday, October 5, 2026**. Running consecutively through August 8, 2027, each week spotlights one of the airline's 44 European hubs:

- Pilots dispatching flights into or out of the active focus hub earn **+250 bonus points** in Orwell.
- Unlockable commemorative digital medallion badges for every completed hub rotation.
- High-density community fly-ins organized on VATSIM and IVAO networks throughout each featured week.

## BUILT FOR AIRBUS COCKPIT HARDWARE: MAXIMIZING PILOT INVESTMENT

A prevalent challenge across the flight simulation community is that aviators who invest significantly in dedicated Airbus flight deck hardware—including Thrustmaster TCA sidesticks and quadrants, Winwing FCU and EFIS units, miniFCU desktop controllers, Cockpit Master MCDUs, and dual-lever Airbus throttles—often find their route choices restricted by virtual airlines that dilute schedules with mixed Boeing or turboprop fleets.

Subria Virtual eliminates this compromise entirely. Every single one of Subria's **44,779 active routes** is tailored purely for Airbus flight decks. Whether hand-flying a visual approach into Innsbruck, managing managed speed and vertical navigation on an A321neo transcontinental cruise, or programming dual MCDUs on an intercontinental A350, pilots extract 100% utility from their dedicated hardware on every sector.

## THE UNIQUE HUB 360 EUROPEAN TOUR PROGRAM

Beyond weekly network rotations, Subria Virtual introduces its signature **Hub 360 European Tour Program**—a comprehensive voyage systematically connecting all 44 European hubs across four regional circuits (Northern, Southern, Western, Eastern) and the continental Grand Tour. Aviators earn permanent, bespoke digital medallion badges stamped on their pilot passport upon completing each tour circuit.

## POWERED BY VAMSYS PHOENIX & PEGASUS ACARS

Subria Virtual leverages the industry-leading **vAMSYS Phoenix** platform and automated **Pegasus ACARS** tracking client:

- **Automated Dispatch:** Seamless 1-click SimBrief flight briefing generation with custom airframe profiles, load sheets, and real-world Eurocontrol routings.
- **Zero Restrictive Gates:** No punitive inactivity strikes, entrance exams, or locked type ratings. Pilots can dispatch any Airbus airframe within their division from day one.
- **Live Radar Telemetry:** Real-time public radar tracking active flights worldwide with zero login required for spectators.

*"Our vision with Subria Virtual was to create a modern home for Airbus pilots that eliminates artificial friction while offering unmatched European scale. Many of us have invested hundreds or thousands into dedicated Airbus cockpit controls, only to find virtual airlines forcing us to compromise with Boeing flights. At Subria, we are 100% Airbus. By launching during 24 Hours of VATSIM, our pilots are not constrained to a single congested airfield—they can dispatch from any hub across our 44,779 routes and connect with worldwide ATC while flying the aircraft they truly love."*

— Subria Virtual Leadership Team

## PRE-LAUNCH REGISTRATION WINDOW & FOUNDING AVIATOR POINTS

Pilot registration opens several days prior to official launch on vAMSYS Phoenix. Early registrants can secure their pilot ID, configure SimBrief airframes, and receive exclusive **Founding Aviator Pre-Launch Bonus Points** directly credited to their career profile ahead of the October 3 launch. Custom 8K/4K liveries are currently being finalized for MSFS 2020/2024, X-Plane 11/12, and Prepar3D.

## FAST FACTS & OPERATIONAL SPECIFICATIONS

| PARAMETER               | NETWORK SPECIFICATION                                                              |
|-------------------------|------------------------------------------------------------------------------------|
| Official Launch Window  | Saturday, 03 Oct 2026 (04:00z) – Sunday, 04 Oct 2026 (04:00z) [24 Hours of VATSIM] |
| Focus Airport Calendar  | Monday, 05 October 2026 through Sunday, 08 August 2027 (44 Consecutive Weeks)      |
| Total Active Routes     | 44,779 Curated Sectors (Short-Haul, Regional, Long-Haul & Cargo)                   |
| Active Aircraft Fleet   | 3,920 Airbus Airframes across 112 Tailored Subfleets                               |
| Strategic European Hubs | 44 Bases across 30+ European Sovereign Nations                                     |
| Global Destinations     | 627 Worldwide Airfields                                                            |
| Hardware Compatibility  | 100% Dedicated Airbus Hardware Support (TCA, Winwing, miniFCU, MCDUs)              |
| Operations Platform     | vAMSYS Phoenix & Pegasus ACARS                                                     |
